
*Rescinds Policy Number:**Issued:*

The news media can be an important means of communicating information about the schools to the community. The superintendent is responsible for establishing an effective working relationship with the news media. The news media should be notified whenever necessary to relay information to the public, such as when there are emergency school closings. The superintendent also is expected to identify opportunities to educate the news media regarding the goals of the board and schools, especially as they relate to student success and the educational program. The superintendent also should inform the news media of the results of the schools' efforts to increase student success.

The superintendent may designate a spokesperson to provide information to the news media. The school district will respond to the media's requests for information in compliance with the board policy on public records, policy 5070.

The board policy on visitors to schools, policy 5020, applies to news media. News media are expected to cooperate with the schools in their efforts to provide a safe, orderly, and inviting learning environment in which disruptions to instructional time are minimized. The principal or superintendent may require news media to leave or prevent news media from entering school grounds if the news media's presence interferes with these efforts.

All representatives of the media shall be given equal access to information about the schools. General releases of interest to the entire district shall be made available to all the news media. There shall be no exclusive releases except as media representatives request information on particular programs, plans, or problems.
